Farmgen is a leading independent UK company specialising in developing, managing and operating Anaerobic Digestion (AD) plants, which use a natural processes to generate electricity. The company is now rolling out a £30 million investment to create the biggest Anaerobic Digestion 'energy farming' expansion programme in Britain.

SolargenPlus is a specialist company supplying Solar (PV) throughout the UK and offers a range of state of the art solar (PV) solutions for you and your business.
A turn-key service for all solar (PV) panel supply and installation.
Our funded option through Feed- in Tariff and Export Tariffs means we pay for the panels, installation and maintenance and you get free energy.

Kirk Environmental is the UK's only company specialising in the manufacture of large storage tanks, Anaerobic Digestion (AD) Tanks. Over the years, Kirk Environmental has developed a unique packaged storage solution service which will deliver significant program and commercial benefits to any anaerobic digestion, municipal, commercial or industrial liquid storage or biogas applications.
With over 35 years of worldwide installation experience and unrivalled reputation through years of successful project completions.

Kirk Environmental is a specialist contractor in the design, supply and installation of liquid storage solutions and Anaerobic Digestion and Biogas Infrastructure. We offer a comprehensive range of solutions to accommodate individual project requirements and budgets. Our specialist approach with Client Partnerships provides all round advantages to the management of projects.

LGE was originally created as "Local Green Energy" and specialise in trading renewable energy on the market. LGE trade the Farmgen branch of the business' renewable energy produced from Anaerobic Digestion facilities. The reliance on in house produced market intelligence ensures a high level of accountability within LGE's trading and operations.
